Dated: 26.10.2026

ADVISORY No. 22 of 2026

Subject: Distance between the place of publication and the place of printing for daily newspapers-reg.

It has been observed that while submitting application for New Registration, registration of a New Edition, or Revised Registration of daily newspapers on the Press Sewa Portal, the distance between the place of publication and the place of printing press, in certain cases, is exceptionally long, making it potentially impracticable.

2. All publishers and stakeholders intending to apply through the Press Sewa Portal for new registration, registration of a new edition, or revised registration of daily newspapers are hereby advised to ensure that the distance between the place of publication and the location of the printing press is reasonable, logistically feasible, and commercially viable. The reasonableness of the distance shall be assessed with due regard to its practicality and operational workability.

3. Accordingly, all concerned publishers and stakeholders are requested to take note of the above advisory and ensure due compliance while submitting applications for new registration, registration of a new edition, or revised registration of daily newspapers.

4. This issues with the approval of the Press Registrar General.
